Twitter Feed

Here is a some text input.

Here is another paragraph of input.

I will build a website that shows how hiking is fun. I will include info about hiking. There will be a section with people's stories with pictures. There will be a Twitter feed section about hiking. There will be social media links. There will also be a place to login in to the site for further use of a blog section. I will use bootstrap and jQuery to build the site with custom JS and CSS. I will also use the Twitter API to have a feed on the site. All this will make the site responsive for different screen sizes with a mobile first design. It will have user click responses of a show/hide on content feature and a simulating a login feature.

Hiking is FUN!
